

Greenskote*[®] 19-3-19

Micro-Prills with *POLYON*[®]

DESCRIPTION: A PREMIUM MICRO-SIZED SLOW-RELEASE GREENS FERTILIZER WITH A 1:1 NITROGEN-POTASH RATIO

BENEFITS: GREENSKOTE*[™] 19-3-19 with *POLYON*[®] :

- is a unique formulation using micro-size particles (-14+35 screen size) with 60% of the nitrogen derived from micro-size polymer-coated urea.
- mower pick-up is virtually eliminated.
- the amount of irrigation required to “water-in” the soluble fertilizer portion is less than with larger materials.
- provides better dispersement of nutrients “more particles per square inch” are applied.
- contains only maintenance levels of phosphorus which is essential for maintaining fine turfgrass. The low phosphorus is also helpful where Poa Annua Programs are being implemented.
- provides high levels of Potassium for increased summer durability, disease resistance and winter hardiness.
- all of the Potash is in the Sulfate form, to aid the turf manager where chlorides may be a problem.
- provides Sulfur and Iron to help produce dark green turf.

APPLICATION RATES:

	Pounds of Actual Nitrogen & Potash desired per 1,000 sq.ft.	Pounds of GREENSKOTE* [™] 19-3-19 To Apply per 1,000 sq.ft.
